

Morning Year 5 - Happy snow day!

Firstly, stay safe if you are out in the snow. Wrap up warm and wear your wellies! As well as enjoying the snow, here are some tasks to keep you busy.

Reading - spend some time reading today with your adult and make sure it is recorded in your small reading diaries. If you have left this at school, bring in a small slip of paper to show me and we can stick it in tomorrow. **1 House Point**

Writing - Can you write an acrostic poem about your snow day - try to include all your senses. What can you see? Hear? Feel? Smell? **1 House Point**

Maths - TTRS, Numbots and Prodigy. Spend some time practising your times tables, addition and subtraction ahead of assessment week next week. Challenge your friends if you can! **1 House Point**

Design Technology - Think of and test materials you could/would like to use for the sail, base, mast, shields and oars. Test in bowls of water different materials. Milk bottles, cardboard, clay, paper... any others you can find! Are they good in water? Do they float or sink? Do the materials stay in their shape? Would they be good to use or not? Take pictures to share if you try this activity, it might be messy, so make sure to tidy up! **1 House Point**

Also, make sure to be as helpful as you can for your adults today!
