

How cars have  
changed in the  
United Kingdom in  
the past 100  
years.

People used to travel on a horse driven carriage but by the early 1900's the first UK car was invented with an engine under the passengers feet.

Below is a picture of a car in 1894 compared to 1908. Discuss how it has changed?

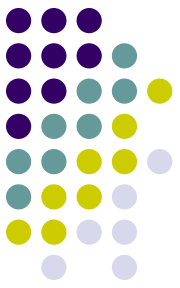

As you carry on to look through each slide in this powerpoint, see how many differences you can spot on each new slide.

Think about why cars have changed so much throughout time.

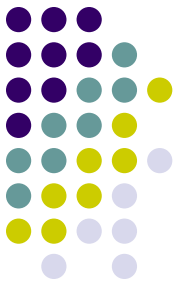

# 1920s

1930s

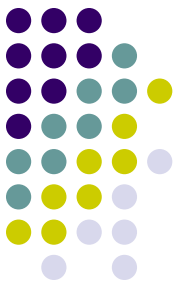

# 1940s

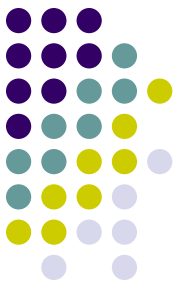

# 1950s

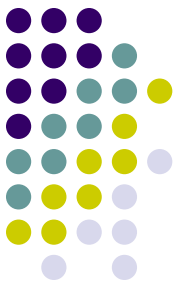

# Mini 1960s

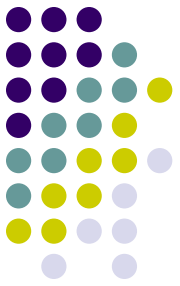

# 1960s

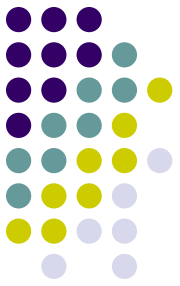

# 1970s

# 1980s

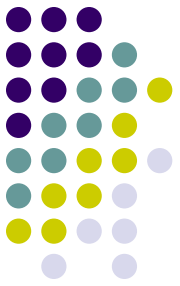

# 1990s

# 2000s

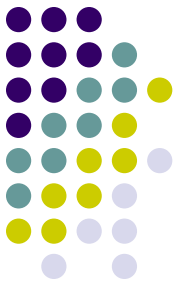

# 2010

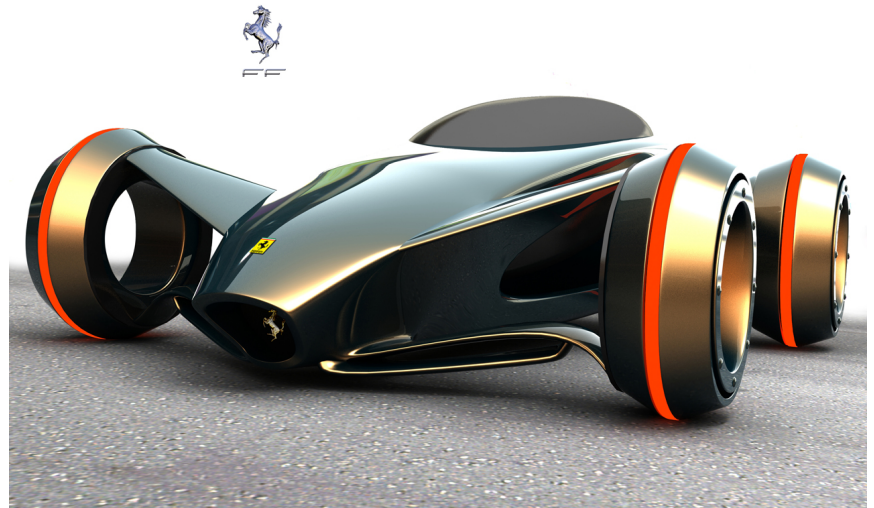

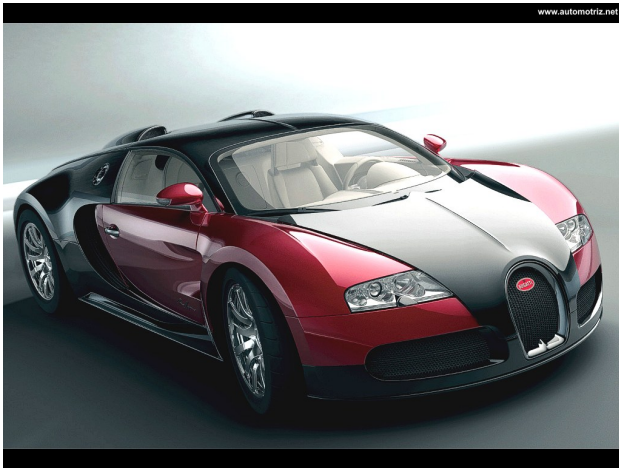

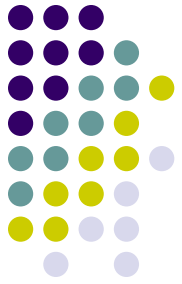

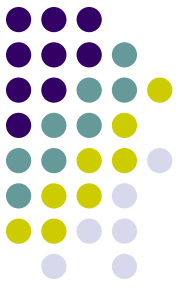

Before cars had an engine they used steam to power them.

I wonder how cars will continue  
to change and how  
they will look like in  
the future.

Now I would like you to use the car pictures  
on the next slide, to put in order  
from 1900 up to 2021 to create  
a timeline for the  
**'History of Cars in the UK.'**

1900

1920

etc
